

ReportsAnywhere Hosted Shopper Count Data

Information Sheet Aug 2014

ReportsAnywhere software provides a single point on the internet, from which one can generate and view reports from geographically distributed, multiple, **iSecure HTA**, **Robovision3D** and **VideoCount** installations.

Also, uniquely, it provides a centralized management panel for all **iSecure HTA**, **RoboVision3D** and **VideoCount** installations connected to it.

Key Features

- ⇒ Web based interface – compatible with PC's, Mac's, Tablets and smart phones.
- ⇒ Manage hundreds of count points remotely, from a single web interface.
- ⇒ Obtain 100's of types of human traffic reports for each count point.
- ⇒ Reports are exportable in various file formats.
- ⇒ **BirdsEye** is an Innovative map based interface that provides a snapshot of counts and health status at various locations.
- ⇒ Generate Health Status reports for each count point.
